Construction Industry Week

Purpose and Goals

- to educate and enlighten CMT students to industry standards, flow, and context
- to create and promote consistent industry involvement and support to CMT program
- to provide real world experience to scholastic curriculum
- to establish and promote post-graduation involvement from alumni via program support
- to publish and promote “OSU Construction Industry Week” as a construction institutional innovation
- to promote and establish excitement and recognition for the competition teams
- to raise the bar for all construction institutional programs
- to provide better recruits and professionals in the construction industry through the use of annual industry weeks which provide industry communication and context to the education of the students
